BRT10[®]

Battery Regenerator

SUSTAINABLE
PROFITABLE
EFFICIENT

Get your batteries regenerated

BRT10[®] : THE MOST UNIVERSAL REGENERATOR AVAILABLE ON THE MARKET

LEAD WET GEL OR AGM BATTERIES

To handle all types of sealed batteries:

• Starting batteries :

- Boat
- Motorbike
- Car
- Truck
- Bus
- Gear TP
- Building machinery...

• Small traction

- Washing machine,
- Lift platforms,
- Golf carts ...

• Solar, stationary, UPS

- Solar power supply
- Backup
- BTS, telecom network ...

Regenerate up to 4x 12v batteries per day

Why buying a new battery when you can get yours regenerated ?

Batterie Plus technology is definitely **not using chemistry**. It treats the batteries with an electric pulsation system using specific frequencies. This leads to the full recovery of the active agents in the battery, turning them from solid back to their original state. Regenerating your battery permits to recover the original capacity and to **extend the life span from 100% to 150%**.

Operating a mix of curative and preventive regeneration programs will double your battery life time, for a greater efficiency and a dramatic cut in your operating costs.

Battery original capacity recovery:

- **Increase the battery performance**
- **Boost your productivity**
- **Reduce your electric consumption**
- **Reduce significantly the electromechanical breakdowns**

BATTERIES REGENERATOR BRT10

Weight	45 kg
Dim.	60x30x47h.cm
4 casters	
Cable 2 x 35mm ²	
Double connections conical plot / nut	
Input :	
Single phase	230 VAC/16A 50 or 60Hz
Out put :	
Batteries	6-48 volts
Pulsation	0-100A
Capacity	50 - 300Ah

Intuitive software

Accessory: battery temperature sensor
